

This is the picture that I've chosen for talk you about my experience in Romania.

- I've chosen this picture because it represents, for me, the best moment of the experience. In this day we've done a falò and then we sing some songs with the guitar.
- During the week we've done a lot of things, some days we went to school, others we've done activities in the city and in some we went out of the city of Lugoj, visiting for example Timisoara or Alba Iulia.
- The funniest thing that happened is when at breakfast Massimo received a burger without the meat inside, and he started saying that he'll study something very difficult like medicine or law only for go there and teach them how to make a burger.
- I've enjoyed this experience a lot, most of all because of the people, we had a lot of fun in every moment. I'm sorry only because I talked so much more with Italians. From them I learned how to make a big friendship with someone that the day before you didn't know in a short time.
- About the culture of the place I liked a lot the Museum of Lugoj, the dresses and the typical objects.
- I'd suggest this experience because it's an amazing way to know a lot of people, practice English, see new cultures, learn a lot of things from people of another country, and make new friends.
